

GAS HOLDERS

Using gas holders at landfills decreases the operation and maintenance costs.

It is possible to manufacture gas holders with requested working pressure and volume. Our experienced technical team installs gas holders on reinforced concrete foundations.

The worlds largest 16.000 m3 gas holder is located in Turkey, which was manufactured by Ecomembrane S.r.l..

High pressure gas holders manufactured from biogas resistant polyester reinforced PVC double membranes are designed to store landfill biogas.

convex is the sole agent of Ecomembrane S.r.l. in Turkey.
